LUBE SKID | NB-80

Whether it's a 250, 500 or 1,000 hour plus preventative maintenance interval, Heritage Industries' lube skid has the capacity to do the job. This self-contained, all aluminum unit can be used as a standalone or in a van, pick-up truck or other service vehicle. Docking rails, forklift pockets and hoist points on each of its four corners make securing and moving the lube skid simple and safe. With its 5 reels, the flow optimized NB-80 provides versatility and capacity plus spill and leak containment. The NB-80's integrated DECKED™ system provides plenty of storage and easy access to items such as filters, tools, shop towels and more.

**Patent Pending*

NB-80 Frame and Tank Assembly

- 80-gallon baffled waste oil reservoir with 1000-watt heating element with internal thermostat
- 55-gallon baffled new oil reservoir with 500-watt heating element with internal thermostat
- 18" x 14" filter drain compartment with perforated floor and 10-gallon capacity
- Folding Sump lid creates work surface when open
- Overall 66" L x 48" W x 60" H, (WEIGHT) lbs

8 Gallon Two Stage Compressor

- Lightweight aluminum Air-End with 270cc Honda OHV engine
- Remote start and choke package with battery

35 lb Grease System

- 60:1 Ratio air pump
- 3/8" x 50' poly dual pedestal oil reel, 6,000 PSI rated

New Oil Product System

- 5:1 Ratio air pump, 5 GPM @ 90 PSI

- Secondary product suction valving, port and 5' lead hose
- Quick-Fill port, 10-micron filtrations
- 12 Micron absolute dispensing filtration
- 1/2" x 50' poly dual pedestal oil reel, 1,700 PSI rated

EVAC Waste Oil System

- 1" double diaphragm pump
- 1" 4-way reversing flow control valve
- 1" 3-way sump suction valve with reverse check
- 1" x 40' dual pedestal oil reel, 250 PSI rated

System Control Panel

- Frame integrated design
- Weather-tight PVC electrical covers
- Extended 120 V GFI Outlet
- Tank heater on/off switches
- Oil product and tank dump rotary air control valves
- 200 Amp 12v jump posts
- 2 LED high intensity work lights
